

PACIFIC INTERNATIONAL RUGBY CHAMPIONSHIP 2027

Eight national teams. Four stages. One champion.

Tournament overview

The Pacific International Rugby Championship is a fictional annual men's rugby union tournament bringing together eight national teams for a six-week competition. The tournament is designed to progress from an opening pool stage into knockout finals, with the final played in Auckland.

Teams

Pool A	New Zealand	Fiji	Japan	Samoa
Pool B	Australia	Argentina	South Africa	Tonga

Competition format

- **Pool Stage:** Two pools of four teams. Each team plays three matches against the other teams in its pool.
- **Quarter-finals:** The top two teams from each pool qualify. Pool A winner plays Pool B runner-up and vice versa.
- **Semi-finals:** Quarter-final winners progress to two semi-finals.
- **Final:** The two semi-final winners play for the championship at Eden Park, Auckland.

Progression and results

Pool standings are determined by match results. A win awards four competition points, a draw two points, and a loss zero points. Bonus points may be awarded for scoring four or more tries or losing by seven points or fewer. Pool ranking determines quarter-final qualification and seeding.

In knockout matches, the winning team advances to the next stage. If a knockout match is drawn after normal time, extra time is played; if still level, the winner is decided by a place-kicking contest.

Venues

Venue	Location	Primary use
Eden Park	Auckland, New Zealand	Opening match and final
